

Medical Imaging Reporting Solution

Data-driven Insights

Perceptive Informatics' medical imaging service offers cutting-edge reporting functions to provide intelligent analysis and presentation of your medical imaging data to help you answer key questions.

The Imaging Dashboard provides a quick and easy access to high level key performance indicators, and the Reports Suite delivers sophisticated interactive capabilities to empower users to view and utilize imaging data with the utmost flexibility. Built with superior performance and usability in mind, our reporting solution supports diverse user groups, meeting their distinct informational needs with meaningful views of timely and accurate data.

Imaging Dashboard

The Imaging Dashboard presents high level imaging performance metrics through intuitive, graphical displays to convey vital study or program information at a glance. It allows study leaders, program directors and senior management to easily glean accurate, up-to-date snapshots of study progress. The online graphical formats enable rapid assimilation and interpretation of data.

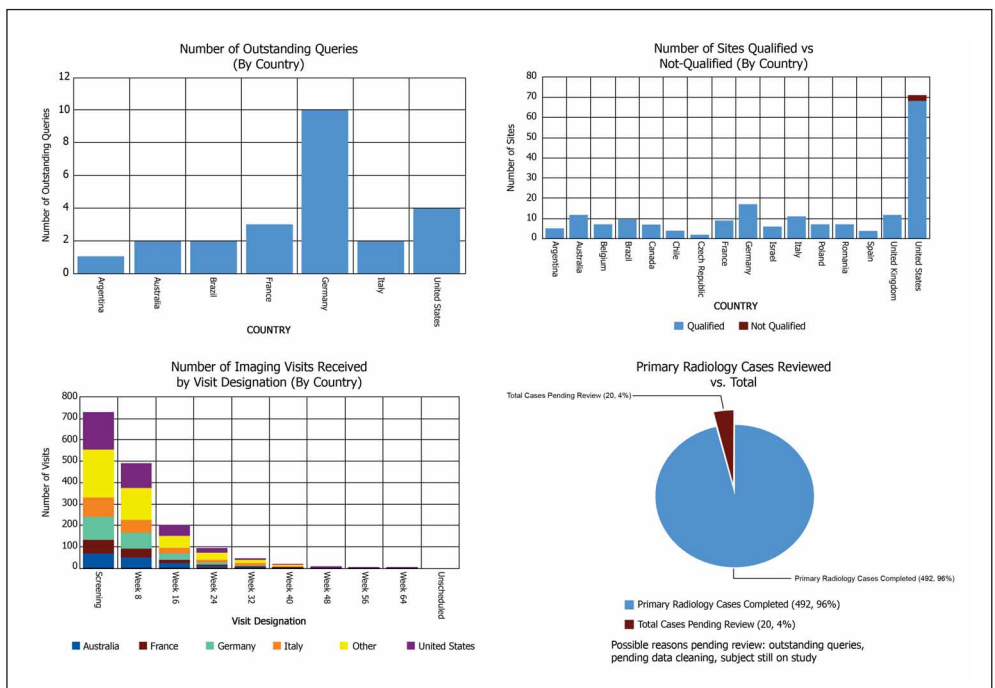

Key Features:

- Graphical displays to aid and enhance data interpretation
- Instant access to key performance indicators (KPIs)
 - Site qualification status by country

- Site image submission status by visit
- Outstanding query status by country
- Overall Radiology review status
- A single centralized place to access imaging metrics for multiple trials for cross-study program monitoring

Online Interactive Report Suite

We provide a comprehensive suite of ready-made, best practice imaging reports for all your imaging studies. The online reports deliver key study progress and tracking information with built-in interactive functionalities to allow users to drill down and interrogate data on the fly. The suite supports the day-to-day operations of all user groups including executive oversight managers, study directors, and CRAs, and can also be made available to site personnel for sharing valuable status information.

Imaging Dashboard

Medical Imaging Reporting Solution

Key Features:

- Ready-made, validated online reports provided for all imaging studies with additional customization options available
- Monitoring and tracking of study performance
 - Site qualification status
 - Subject and visit status
 - Image receipt and central review status
 - Query status
- Metrics Consortium Champion (MCC) Reports
 - Ready-made reports of industry-standard performance metrics for imaging core labs as defined by the MCC
 - Key study performance indicators deemed by the MCC as the most informative and readily actionable
 - Progress tracking against defined target levels across all MCC criteria
- Sophisticated interactive functionality
 - Save and e-mail reports complete with interactive analysis features
 - Filter, sort, hide and highlight data directly within the report
 - View and export data in graphical displays including pie, line or bar chart format
 - Download data in a variety of formats including Microsoft Excel, HTML and CSV
 - Open and view multiple report windows simultaneously for easy data comparison

Interactive Reporting Feature Set

to allow defined users to share and collaborate on the creation and update of study documents. It gives an enhanced visibility of study progress, facilitates strong team collaboration and promotes strong and productive study communities.

Let Perceptive help you gain critical insights and knowledge regarding your imaging studies. You can rely on our solution for all your reporting and analysis needs.

Enhance Communication Across Study Community

When you utilize Perceptive's Imaging Reporting Solution, you also have access to the online communication forums where users can share and access relevant study documentation and interact with other users. This area provides robust document collaboration and communication facilities
