

Integration Services

Integration made easy

Key features

- Integration with DataLabs® EDC, ClinPhone® RTSM and IMPACT® and TrialWorks® CTMS applications, Medical Imaging and ePRO as well as third-party solutions
- Real-time data interchange making data instantly available across multiple systems
- Middleware platform serves as the central hub controlling all interactions and exchanges between multiple technologies in use
- Ready-made, validated connectors with built-in integration functionalities
- Custom integration services including hosting, maintenance and monitoring of all integration processes and data interchanges
- Fully audit trailed integration

Key Benefits

- Full visibility and supportability of product integrations
- Ability to share consistent and accurate trial data across key systems throughout the entire enterprise
- Ability to make timely and informed management decisions based on accurate, real-time trial data
- Streamlined process and efficient workflow for site, sponsor and CRO users
- Elimination of data reconciliation and duplicate activities
- Accelerated database lock

Proven Track Record of Expertise

Perceptive Informatics combines a deep knowledge of the latest technologies and the ability to integrate systems and processes to help companies simplify the concurrent use of the multiple technologies involved in clinical development. Perceptive's integrations are delivered by our dedicated eClinical Technology Services (eCTS) experts who understand

advanced technologies, clinical development processes, regulatory requirements and validated system integrations. Leveraging the clinical and technology expertise of eCTS staff as well as our robust integration platform, clients can identify and implement clinical trial process improvements and share knowledge across multiple, disparate systems.

Cutting-Edge Technology

Perceptive Informatics' leading-edge integration solutions and services are underpinned by our Clinical Technology Integration Platform (CTIP). Perceptive's CTIP is a unique environment designed to facilitate seamless exchange of data across different systems via reliable and repeatable integrations without having to modify the applications on connected systems. Built on proven middleware to support two-way real-time data interchange and product interactions, Perceptive's CTIP is the robust foundation upon which diverse clinical trial applications work together synergistically.

Integration Services

For clients requiring ready-made integration solutions to be installed alongside the enterprise implementations of Perceptive's technology products, we offer validated connectors with built-in integration functionalities. These connectors allow automated access and exchange of data between our enterprise software products, all within the client's operating environment for optimal scalability and convenience. Perceptive's experienced integration consultants ensure connectors are built to meet your individual needs and provide installation consulting, training and support for easy, hassle-free implementation.

Service Excellence

Through our CTIP and dedicated eCTS staff, Perceptive Informatics provides integrated solutions for your clinical trials. This includes robust and validated integrations between our hosted products and key third-party hosted clinical trial technology solutions. Our services include proactive maintenance and monitoring of all integration processes and data exchanges to ensure a smooth day-to-day running of your integrated studies. With a proven track record of successfully delivering a vast number

of integrated solutions, we have the know-how and expertise to apply industry best practices to help clients realize the benefits of powerful integrations.

Our experienced team of integration experts would be happy to advise on your specific integration requirements. Our integration team will work closely with you through every step of the way including the design, system validation and ongoing management of your integration processes.
