

Tracer Management and Distribution Services

Radiotracers are essential for seeing biologic activity in real time, yet they can be a single point of failure in nuclear medicine trials. Tight delivery windows, controlled handling, and regional/regulatory constraints can create delays or missed imaging timepoints if supply isn't tightly coordinated. Perceptive Imaging provides centralized tracer management services across CNS and oncology studies to:

- ▶ Reduce site burden
- ▶ Ensure timely delivery
- ▶ Minimize supply-related disruptions

▶ **10** Years of
experience

▶ **50+** Trials
supported

Rely on our dedicated tracer supply management team, who use their expertise and experience to provide efficient and appropriate tracer strategy globally.

Investigational Tracer Services

- ▶ Manage oversight of tracer supply between CDMO and imaging center
- ▶ Training and oversight of dose orders
- ▶ Coordinate transportation through qualified vendor
- ▶ Dose management tool support
- ▶ Contractual agreements and close communications that foster data sharing between pharma/biotech and CDMOs

Commercial Tracer Services

- ▶ Establish SOWs/contracts/communication plans with vendors
- ▶ Collect appropriate licensing and country-specific documents, including RAM licensing
- ▶ Escalate sponsor concerns, hold scheduled meetings with vendors

Site selection and onboarding

We routinely partner with sponsors to provide guidance on site selection and to confirm tracer feasibility and align onboarding requirements to tracer access considerations. This is especially important with investigational tracers as many are limited for use in certain geographic regions.

Before your trial begins, Perceptive can help you determine regional tracer availability to ensure the sites you select are qualified to participate based on their ability to receive and use your tracers of interest.

Tracer supply by therapeutic area

THERAPEUTIC AREA	DETAILS
Central Nervous System (CNS)	<p>Commercial CNS tracers supported through our network:</p> <ul style="list-style-type: none">• Amyvid® (PETNET)• Neuraceq® (Life Molecular (LMI))• Vizamyli™ (GE Healthcare)• DaTscan (GE Healthcare) <p>Investigational CNS tracers also supported</p>
Oncology	<p>PSMA (multi-vendor supply model): We have global vendor relations to support PSMA tracer distribution i.e., Curium, Blue Earth and Sinotau (APAC), etc.</p> <p>Additional oncology tracers:</p> <ul style="list-style-type: none">• FAP/FAPI: Support for investigational FAPI tracers through partner supply pathways• ImmunoPET: Support for ImaginAb's CD8-targeted tracer

Availability note: Tracer availability varies by geographic region; please inquire.

Let Perceptive take the hassle out of tracer supply management
