

Clinical Adjudication Services

**Achieve trial milestones with
confidence**

In an industry where faster trial outcomes and uncompromised data quality are paramount, Perceptive offers the precision, quality, and support you need to meet critical milestones with confidence.

Our clinical event adjudication team brings over three decades of combined experience to your program. And with our dedicated project management support, including clinical nurses with diverse therapeutic backgrounds, you can rest assured that your data—and your timelines—are in good hands.

Tailored Adoptable Solutions

Perceptive offers tailored solutions designed to meet your specific clinical adjudication needs including subject eligibility committee, digital pathology committee, independent review committee, and clinical event adjudication committee for safety events and/or adverse events of special interest. Our services include:

- ▶ Identifying and contracting adjudication committee members
- ▶ Creating event reporting Electronic Data Capture (EDC) forms
- ▶ Facilitating a consistent, objective identification process for events from the EDC
- ▶ Developing the adjudication committee charter
- ▶ Developing project-specific event adjudication workflows and paradigms
- ▶ Collecting event source data from sites and/or ancillary core labs
- ▶ Designing event-specific adjudication forms
- ▶ Coordinating Adjudication Committee meetings
- ▶ Producing adjudication training materials for study teams and sites
- ▶ Developing and implementing an Electronic Adjudication System (EAS)

Extensive Network of Key Opinion Leaders

We have built connections with over 250 global experts and key opinion leaders, each bringing extensive knowledge in their therapeutic fields, clinical research, and clinical adjudication.

Perceptive can contract independent committee members, or work in collaboration with committees from academic research organizations.

Innovative Technology

We utilize a web-based EAS that complies with 21 CFR Part 11 standards. This system improves the efficiency of the adjudication workflow while maintaining a comprehensive audit trail of all activities.

Our system offers a standardized and secure online data repository, protected by firewalls and restricted access platforms to ensure data integrity, and many other advantages, including:

- ▶ Secure, 24/7 access, with customizable restrictions based on protocol, site, user, and role
- ▶ Direct data uploads from sites, featuring built-in anonymization and redaction tools
- ▶ Centralized electronic tracking and storage of all event data and adjudication results
- ▶ Real-time audit trails and reporting for complete transparency throughout the process
- ▶ Direct export of adjudication results for detailed analysis
