

Keep your clinical trials on track

Right-fit randomization and trial supply management solutions. Designed and supported by the experts.

Ensuring your trials stay on track is a critical challenge. As RTSM pioneers with over three decades of experience, Perceptive eClinical are more than an RTSM provider; we are your ally. Our industry-leading experts deliver flexible, right-fit solutions to accelerate your trials, reduce your costs and safeguard your most valuable assets; your data and your patients.

Answering your challenges, today and tomorrow

When you need to...

► Increase trial complexity

From simple study designs to the most complex protocols, our experience enables you to confidently keep your trials progressing.

► Adapt

Our experts use their unparalleled understanding of protocol, packaging and operational risks to design a right-fit solution for all modalities, formulations and indications with tailored risk management.

► Innovate

We look to the future whilst building on our 30+ years of study design and support, with 3 platforms now available supporting all trial needs.

► Accelerate delivery

We are always ready for your first site and first patient, with built-in flexibility and real-time access to quality data, from as little as 2–4 weeks*.

*simple studies and repeat trial designs

► Mitigate disruption

We help you plan for the unexpected and manage the unexpected with a library of over 200 risks and a catalogue of best practices which has supported over 4,700 trials.

► Seamless Integration with 40+ vendors

Our dedicated project management ensures effective, proactive communication with partners and vendors and seamless integration with 40+ third-party platforms.

► Enter into new markets

We make it easy, with global delivery teams who support trials in over 100 countries worldwide including US, Europe, Japan and China.

The **alliance** of **expertise, innovation & agility.**

Supporting patient and clinical supply management through the clinical trial journey.

Randomization

Power your trials with Perceptive eClinical industry leading solutions – trusted in over 4,700 trials to date.

► Any methodology supported, from simple to complex

Any need can be met, from simple stratified or unstratified randomization lists, to dynamic randomization, adaptive randomization and cohort designs, and in-study design adaptations.

► Unmatched support

Every study is supported by a dedicated experienced RTSM specialist, with an average of 9 years experience. Including in cohort management/dose finding, adaptive designs, master protocols, and Bayesian adaptations. We support you from randomization list creation to final data release.

Trial Supply Management

Ensure timely patient resupply with advanced inventory management – no matter the schedule or treatment complexity.

► Unrivalled flexibility

Take advantage of our advanced inventory management options for unrivalled flexibility to support scarcity and expiry concerns. We help you reduce wastage by up to 40%, and reduce your costs, even with unpredictable patient treatment, all while relieving your stock monitoring effort.

► Expertise from start to finish

Your study is supported throughout by a dedicated RTSM specialist with at least 12 years' experience. Whatever your goals, they will identify the right supply strategy for your trial and help you overcome any ongoing challenges.

Study Management

Manage users and sites, screening, and randomization with ease. With data quality a priority and data access to allow you to efficiently manage your trials.

► Designed for the life of your trial

Meet your protocol requirements today and allow for future flexibility if your needs change and if your study needs to change and adapt. Our experienced team of RTSM consultants analyse your unique requirements, identify risks and anticipate future needs, designing an approach that is effective, adaptable and future-proof.

► Personalized support

Every study has a dedicated Project Manager supported by a team of RTSM specialists, who anticipate and quickly resolve situations which jeopardize your study milestones.

Reasons to choose Perceptive eClinical

Accountable

We are accountable and reliable, delivering 100% of studies on time for First-In-Patient, seamlessly integrating with over 40 vendors, and starting studies in as little as 2 to 4 weeks*.

*simple studies and repeat trial designs

Customer-centric

With perceptive and diligent expertise, we leverage operational insights from over 4,700 trials and 2.7 million enrolled patients to keep your trials on track and drive costs down.

Quality

With 99.9% system uptime, our platform is dependable for you, your sites, and your patients, and we have proudly supported science in 500+ regulatory approvals.

Our locations

Perceptive has global headquarters in the US and UK. With 13 offices across Europe, America, and Asia, so we're on the ground wherever your studies take place. With local support in China, India, Europe, and North America, you can have confidence that your research and clinical trials will run smoothly and deliver high quality data you can rely on. Every time.
